Answering a question that nobody asked, I have sourced alternative gas struts from Stabilus who are an OE supplier.

In my experience, gas struts lose charge after 5 or more years of service and will need replacement.

I have listed two options:

Originally supplied with the 4C kit:

Red Hound Auto Gas Charged Lift Pair

Open Length: 17 in; compressed: 10.25 inches

Stroke Length: 6.75 inches

Rod Diameter: 6mm || Force: 90 lbs.

Compatible with 10mm Ball Mounts

RED829006

[Red Hound Auto RED829006](#) (there are also 97lbs and 120lbs versions if you need more lift e.g. aftermarket spoiler)

Stabilus alternative gas strut (identical dimensions direct replacement)

[Stabilus Lift-O-Mat 860328](#)

Same length (see attached pdf)

400N - 90lbs (equivalent lift force)
